

# EDUCATION SERVICES

**Highly-specialized education services and programs for children with complex disabilities.**

Our Alternative Education Program assists students from ages 3-22 that live with complex or multiple unique needs, and who may require a high degree of specialization in tailoring their education experience. LeafBridge works together with local school districts to help determine the optimal environment and services to meet each student's needs and maximize their opportunity for development. Through these partnerships, LeafBridge seeks to elevate the standards of education for students with multiple and complex disabilities. LeafBridge offers an on-site Alternative Education Program in Brooklyn Heights with half and full day options available. We also offer various summer programs, including Extended School Year and Summer Camp.

## WHAT TO EXPECT

UCP's LeafBridge Education Services is here to serve Northeast Ohio students with complex disabilities. At our new Education Services building, conveniently located off of the 480/77 interchange, you will find a team of professionals ready to welcome you and your child. From intake to evaluation and intervention, you will feel the inviting sense of community shared amongst our students, their families, and our staff. Our site is filled with state-of-the-art supports that assist us in completing a team-based evaluation that is fun, engaging, and catered to the needs of each child.

Knowing that it is not possible for every child to come to our site, some of our services can be brought to your child's school district. Contact us to learn more about these opportunities.

### Independent Educational Evaluations

Our highly-skilled professionals provide comprehensive evaluations, empowering schools to meet the needs of each student.

### Assistive Technology Evaluations

Our technology experts evaluate options for learning, communication, mobility, leisure, computer access, self care, and employment.

## BEST-IN-CLASS SERVICES

Our transdisciplinary approach is different from other programs, as experienced therapists and intervention specialists plan instruction together to ensure each student's curriculum is customized to their needs.

Our on-site staff includes expert speech language pathologists, physical therapists, occupational therapists, RESNA certified assistive technology professionals, intervention specialists, and professionals with extensive experience in Cortical Vision Impairment (CVI).

### Collaboration with local school districts

We offer in-person or virtual consultation and training services to school districts across Northeast Ohio.

### Partnership with local law firms

For families seeking or engaged with legal representation, we offer consultation and specialized evaluations.

“ The staff is like family to me. The parents form an instant bond because, like us, the staff recognizes the true potential in our kids. It allows us to work together towards the same goal of advocating for our children and providing them with the opportunities that they deserve. ”

– Parent of a LeafBridge Child
